Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Mar 2, 2005 has been entered.

The application contains 3 claims, numbered 1, 3 and 5. Claims 2 and 2 have been cancelled.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 106. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are

not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance. It is also note that the rubber cap is not labeled neither identify in the specification.

Claim Rejections - 35 USC § 102

Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Short (Pat No 3,177,025).

The patent to Short discloses a container holder comprising a body having a lower end (20) with an aperture, a side member (10) extending from the lower end and having a lip (26) directly above the lower end, said lip having means (shape of the lip) for increasing holding capability. The patent to Short is capable of suspending a bottle from an ironing board.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Short in view of Barts (Pat No 3,794,285).

The patent to Barts discloses a bottle holder having a lower end, and upper lip substantially directly above the lower end, and a side member having curved back surface (for example 23). It would have been obvious to one skilled in the art at the time the invention was made to have provided the holder shown by Short with a curved back as shown by Barts for a variety of reasons; for example, reinforcing, aesthetics, etc.

Claims 1, 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Snelling (Pat No 2,252,235) in view of Barts.

The patent to Snelling discloses a bottle holder comprising a lower end having an aperture, and a side member extending from the lower end, and a securing means at an upper end for securing the holder to a doorknob.

It would have been obvious to one skilled in the art at the time the invention was made to have provided the holder shown by Snelling with a bended lip as shown by Barts to further secure the bottle. It would have been further obvious to one skilled in the art at the time the invention was made to have provided the holder shown by Short with a curved back as shown by Barts for a variety of reasons; for example, reinforcing, aesthetics, etc.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Davis (2,532,255) and Jacob (6,152,416) show a hanger device

Art Unit: 3632

having friction means at its top end, Ahmer (3,761,044) shows a hanger device of interest.
